

PROJECT REPORT

INTRODUCTION

Name: Kanishk Pramod Sinha

Registration Number: 25BCE10302

Branch: CS Core

Year: First Year B.Tech

Course Code: CSE0001

TASK 1: DIGITAL LITERACY INFOGRAPHIC

- For this task, I created a digital infographic using Canva to explain the concept of digital literacy. The infographic includes key topics such as safe internet practices, useful digital tools for students, and maintaining a professional online presence. The design was kept simple and visually appealing using icons, minimal text, and structured sections to ensure clarity and readability.
- One of the interesting aspects of this task was learning how to present information visually rather than through text. Choosing the right layout and balancing visuals with content was slightly challenging, but it helped me understand the importance of design in communication. Overall, this task improved my ability to convey information in a clear and engaging way.

TASK 2: DIGITAL PORTFOLIO

- In this task, I created and updated my profiles on platforms such as GitHub and LinkedIn to build a professional digital presence. On GitHub, I created a profile README that includes my basic details and my learning goals. On LinkedIn, I added my education details including my degree, institution, and expected graduation year.
- These platforms serve different purposes: GitHub is used for showcasing projects and coding skills, while LinkedIn helps in professional networking and career opportunities. Over the next four years, I plan to regularly update these profiles by adding projects, skills, and achievements. This will help me build a strong portfolio for internships and job opportunities.

TASK 3: PLATFORMS EXPLORATION

- For this task, I explored both coding platforms and collaboration tools. I created an account on a coding platform and completed a beginner-level challenge, which helped me understand the basics of problem-solving and coding practice.
- Additionally, I created a Google Form titled "Digital Literacy Awareness Quiz" with five questions related to digital literacy. I also linked the responses to a Google Sheet to analyze the data. This task helped me understand how online tools can be used for collaboration, data collection, and learning. These platforms will be useful for academic work, group projects, and skill development.

TASK 4: EMAIL ETIQUETTE & COMMUNICATION

- In this task, I drafted two professional emails: one requesting an assignment extension and another expressing interest in an internship opportunity. While writing these emails, I focused on maintaining a formal tone, clear structure, and proper etiquette.
- A common issue in digital communication is the use of informal language or unclear messaging, which can create misunderstandings. For example, sending a vague or poorly structured email to a professor can lead to confusion or a negative impression. This can be avoided by using clear subject lines, polite language, and proper formatting. This task helped me understand the importance of professionalism in online communication.

TASK 5: CYBERCRIME AWARENESS

- In this task, I studied UPI payment fraud and created a detailed case study explaining how such scams occur. I also prepared a prevention checklist with practical tips to help students stay safe online.
- What surprised me the most was how easily people can be tricked into sharing sensitive information due to lack of awareness. Many scams rely on simple psychological tactics such as urgency and trust. As a result of this task, I will be more cautious while handling online transactions and will never share my UPI PIN or personal details. This task highlighted the importance of awareness and responsible digital behavior.

CONCLUSION

- This project provided valuable insights into digital literacy and its importance in everyday life. It helped me develop skills in using digital tools, building a professional presence, communicating effectively, and staying safe online. Overall, the project has strengthened my confidence in navigating the digital world and prepared me for future academic and professional challenges.
